Data Visualization with Power BI and Tableau
Practical – V

Roll No.: T031	Name: Ishita Patel
Class: TYIT	Batch:01
Date of Assignment: 20-08-2026	Date/Time of Submission:20-08-2026

Analyzing Data using Table Calculations in Tableau

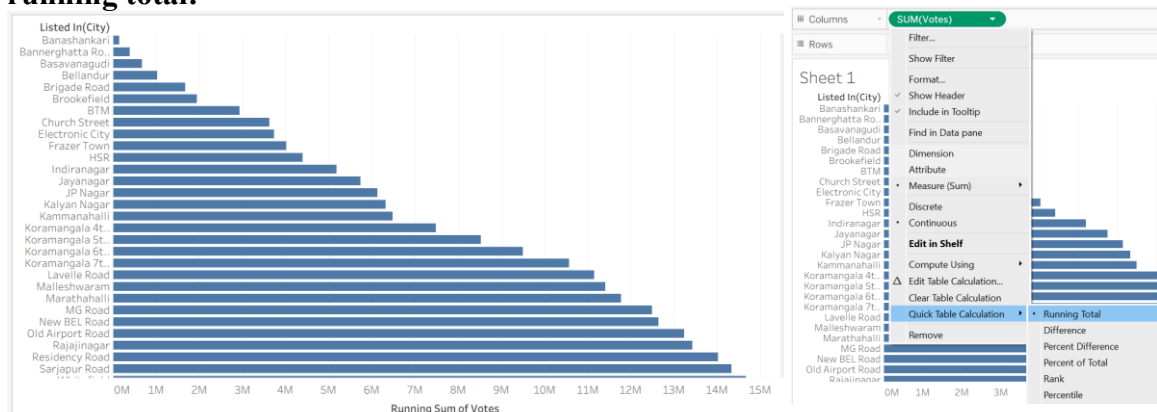

Step:- Open Tableau and connect the required dataset.

Create a worksheet and add the required dimensions and measures.

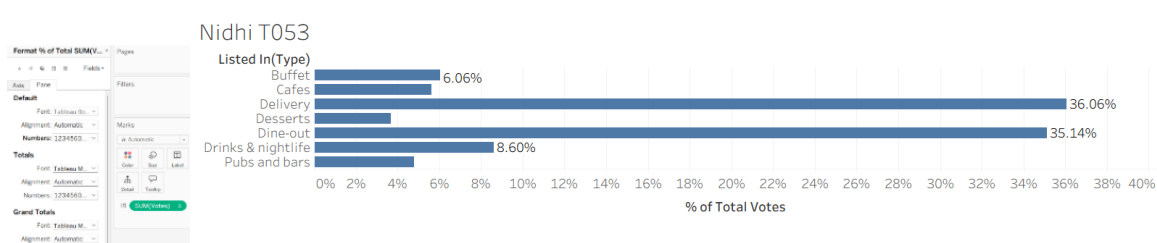

a) Apply quick table calculations (running total, percent of total)

Steps:- Apply Quick Table Calculations such as Running Total and Percent of Total.

running total:-

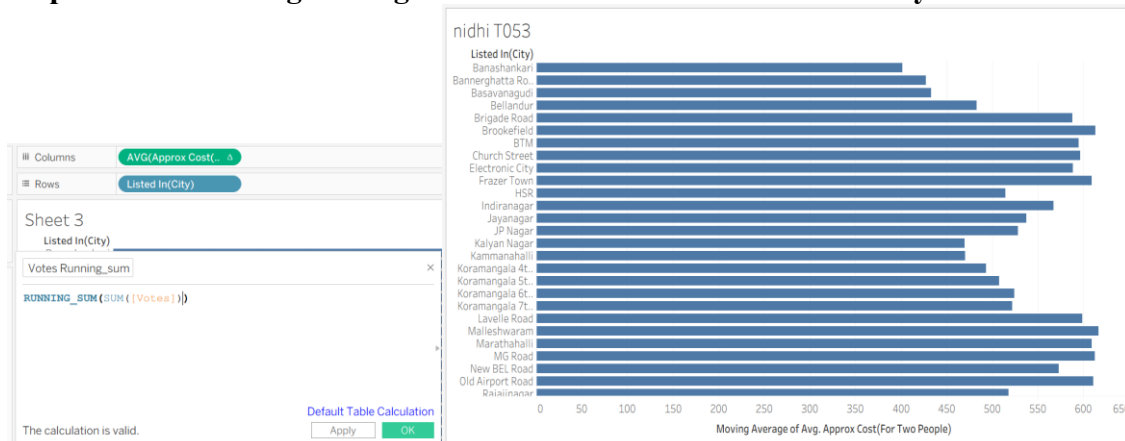

Percent of Total:-

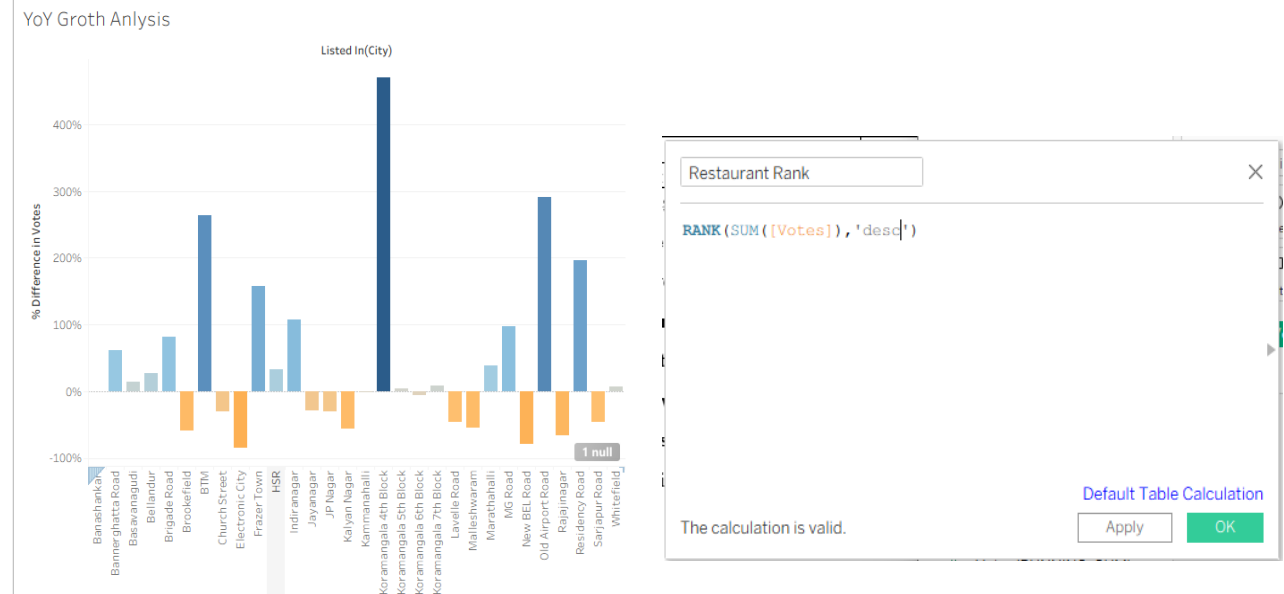

b) Create moving averages and cumulative metrics

Step:- Create Moving Average and cumulative calculations to analyze trends.

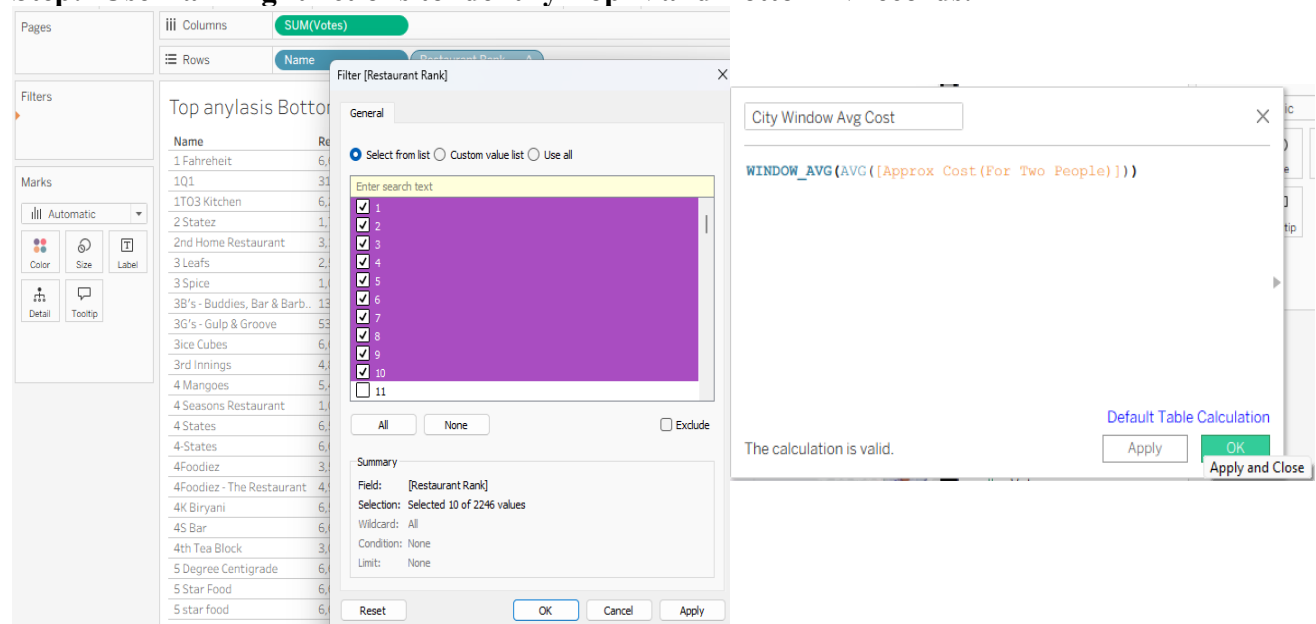

c) Perform year-over-year growth analysis

Step:- Perform Year-over-Year (YoY) Growth analysis to compare values across years.

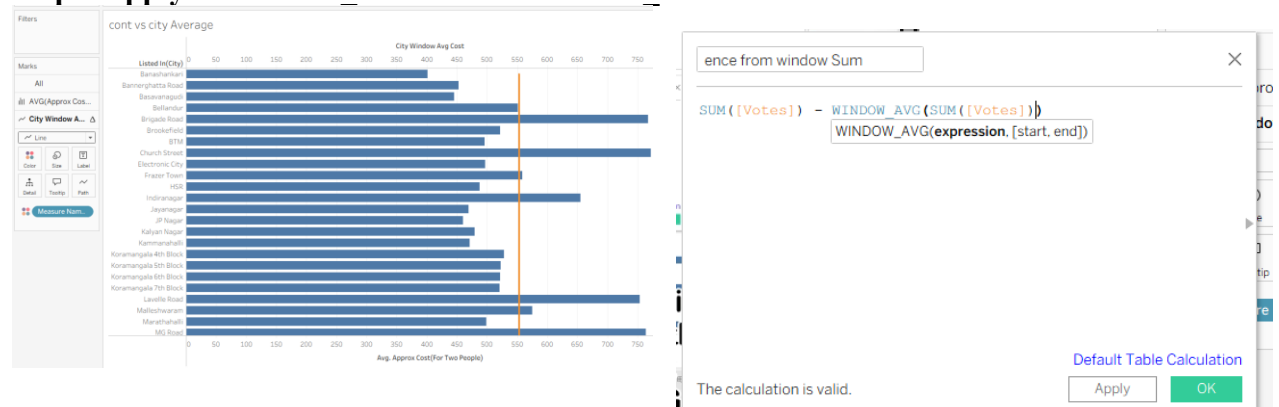

d) Use ranking functions (Top N, Bottom N)

Step:- Use Ranking functions to identify Top N and Bottom N records.

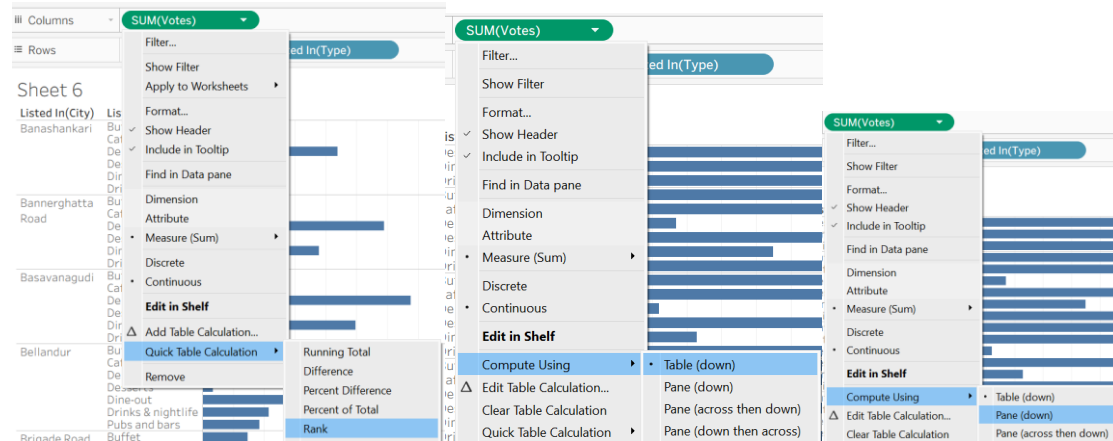

e) Implement window functions (WINDOW_SUM, WINDOW_AVG)

Step:- Apply WINDOW_SUM and WINDOW_AVG for window-based calculations.

f) Customize addressing and partitioning

Steps:- Customize addressing and partitioning according to the required analysis.

g) Create dynamic titles and labels using table calculations

Step:- Create dynamic titles and labels using table calculations.
